Evergreen trees***	

\* Denotes "improved" cultivar of a species native to Illinois. Can substitute with other disease resistant cultivars.

\*\* Sensitive to road salts and pollutants, plant away from streets

\*\*\*Evergreen trees shall not be utilized as street trees, however, are acceptable within open space on a property.

### **Additional Information**

This list is intended to be a general list of approved trees. Other tree species may be approved by the Village Arborist or Landscape Consultant.

Village Arborist  
Ed Pfaff, Forestry Supervisor  
[epfaff@montgomeryil.org](mailto:epfaff@montgomeryil.org)  
630-896-9241

All trees planted within the parkway or required planting zones shall have a minimum trunk diameter of 2.0 inches. Diameters shall be measured 6-inches above finish grade. All trees shall be first grade nursery stock with straight trunks, straight and live central leader and full well-developed crown consistent with the species/variety.

It is in the Village's best interest to minimize the customization of landscaping that occurs around the base of parkway trees. The improper mounding of mulch, construction of planter boxes, the installation of paver or concrete edging around parkway trees and other improvements of such nature may be detrimental to the tree, and therefore, the Village Arborist shall have the authority to remove such improvements or require the removal of the improvements by the adjacent property owner at the property owner's expense. The property owner shall receive written notice of the violation and be provided five (5) days to correct the violation prior to removal by the Village Arborist.
