

## **NOTICE OF FUNDING**

### **2025 WATER MAIN REPLACEMENT PROJECT**

This project is possible through financing from the Drinking Water State Revolving Fund (SRF). The Illinois Environmental Protection Agency administers the SRF program and receives a portion of its funding for these types of projects from the U.S. Environmental Protection Agency.

These projects include the installation of 8-inch and 12-inch ductile iron water mains, water services, valve vaults, hydrants, and all related appurtenances. Once complete, these projects will enhance water quality, improve energy efficiency, and increase system resiliency for area residents and businesses in the Village of Montgomery. SRF programs operate in each state to provide communities with the resources necessary to build, maintain, and improve the infrastructure that protects one of our most valuable resources: water.
